that the large audience listened to his address. His remarks were a little out of the ordinary, and they showed carnest and deep thought, something from the well-spring of a lifetime's consideration. During the course of his address, Professor Griggs showed that the ideals of democracy had developed during the last century more than during any other period of civilization. The conception of free government was, however, widely different from that prevailing in older societies. He showed that the people of this country have grown away from the abstract notions of liberty and equality that prevailed in the time of the French Revolution, and had come to estimate democracy with reference to lis result in manhood and wopanhood. Moreover, the larger social ideal of today, with the development of republican government, had changed entirely the problems of free government. While these changes disarm certain criticisms of democracy, the difficulties in the American people's path of national life are still very great. The worst of these he characterized as the negative selfishness of indifference, shown often by those very people who imagine they are the salt of the earth. The case with which men unhinge their consciences in turning from private to public life, and the absorption of the interest in the family, with little to the public good, were taken as evidences of that selfishness.

Next in importance among the menaces to the American mational life the speaker took to be the increasing flekieness in the popular mind, shown in a careless admiration of the men who succeed, with a lealousy of true menal leadership. Mr. Smith's Address.

An eloquent oration was delivered by Hon. Alfred Ethebert Smith, a member of the Massachusetts Society of the Cincinnati, on the subject, "The Past, An Inspiration for the Present." Mr. Smith, a forceful and graceful manner, drew many useful lessons from his subject, and pointed out the obligation for higher citizenship and patriotism that rested upon the present members of the Society of the Cincinnati, because they are the descendants of the Illustrious Revolutionary officers who instituted this historic military order in 1783.

Mr. Smith said in part, "In no one of the thirteen colonies did the cause of independence develop faster than in Virginia. A prespectus and brilliant society flourished on the banks of the rivers, and a hardy race ocupled the uplands, and hinters and pioneers were pushing it toward the oblio. "It is mete that we pause in the intense activity of this commercial age and review the deeds of heroism and unselfish devotion of the patriots, who fought, bled and died in the sacred cause of human liberty.

"They have long since gone to their glorious reward, honored and beloved, leaving to us a priceless heritage.
"Are there no tasks, no duties for us? Will the fires of liberty, lighted by them burn brightly without our wateful care?
"Ah, no. The years that have flown have made us the greatest nation, rich and populous. The souvenir menu card for this banquet History of Cincinnati.

The Society of the Cincinnati was instituted by the officers of the American army in the Contonnient of the Hudson River. May 10th and 13th and June 19th, 1732. The officers of the French army did not assist in instituting the Order of the Cincinnati, as has been sometimes erroneously stated. In fact, after the Cincinnati, had been instituted by the officers of the American army, they, by special vote, made honorary members of the then French minister, Chevaller de la Luzerne, Count de Estang, Count de Grasse and other French officers who had aided the American cause, including Count de Rochambeau, and the generals and colonels of his army (the co-operating French army of the Revolutionary War). The distinction of the Order of the Cincinnati was much esteemed and sought after in France, but there was never a French State Society, as some unofficial and unauthorized publications have incorrectly stated, because only the thirteen original States were permitted to have State Societies of the Cincinnati. The French officers who were made honorary members did attempt to have a tentative organization in France fully twelve months after the American officers instituted the Cincinnati, which never became legal, because it failed of ratification by the State Societies of the Order (composed of the thirteen original States), and so the attempted French society never had legal existence, and the French officers, who were made honorary members by the American officers who founded the Cincinnati, remained honorary members morely, until scattered by the Reign of Terror, when there ceased to be any Cincinnati in France.

Within the covers, at intervals, appear beautiful and rare engravings of Washington, the first president-general of the society; of Major-General Henry Knox, the first secretary-general; of Major-General Horatio Gates, first president of the Virginia Society, of Washington at the battle of Princeton and of Washington and Lafayette at Valley Forge.

A recent case is that of Mrs. Peter Morrissette, of No. 315 Eleventh Street, Alpena, Mich., who writes as follows: "My trouble started with childbirth. After one of my children was born I had a kind of paralysis. I was very weak and my mouth was a little crooked. I was always tired, and was so nervous that I could not bear to hear a dog bark or a bell ring—even the little bird in its cage would annoy me. My heart fluttered a great deal, and I had dizzy spells. I was not able to be left alone.

"My doctor gave me different kinds of medicine, changing it several times. When it was evident that he could not help me he said he did not understand my case. This was three years age, and I was very much discouraged, when my brother, who had taken Dr. Williams' Pink Pills, recommended them to me. I tried them and noticed a change for the better when I was taking the second hox. Dr. Williams' Pink Pills cured me, and I have been well ever since. I now do all my own housework, sewing and washing for seven of us."

life. He held further that history and
literature should be taught so as to
cultivate deliberately a reverence for
true moral leadership.

The closing portion of the lecture was
devoted to a somewhat detailed discussion of the effort for training moral
leadership in the high schools and colvleges. He emphasized the need of keepingthe American university democratic in
spirit and generous in its service to the
community. He held that only as mure
